 $Graduate\ Research\ Assistant$ 

May 2017 to May 2022

Supervisor: Prof. Shrikanth Narayanan

- Proposed methods and frameworks to extract speaker role information in structured conversational interactions and used this contextual information to improve the performance in various speech processing tasks (e.g., diarization, speech recognition)
- Led a subgroup of Ph.D. students that, in collaboration with experts from the medical field, developed a real-world system which processes audio recordings of psychotherapy sessions and gives feedback to the therapist. The system is used for computer-aided therapist training.
- Published results in top-tier journals and peer-reviewed conferences.
