Signal Analysis and Interpretation Laboratory (SAIL)

Graduate Research Assistant

May 2017 to present

Supervisor: Prof. Shrikanth Narayanan

- Developing computational methods to represent intersectional dimensions of identity (e.g., gender, age, social status, profession) to study how such dimensions affect conversational interactions.
- Leveraging speaker role information in various speech processing tasks (e.g., diarization, speech recognition).
- Leading a subgroup that develops a real-world system which, after processing recordings of psychotherapy sessions, gives feedback to the therapist. The system is used for computer-aided therapist training.
